

A-LEVEL PROGRAMME GUIDE

A-Level Chemistry Programme

Structured Learning.
Stronger Understanding.
Confident Exam Performance.

Supporting students from Year 12 through to A-Level examinations.

Experienced Science Teacher

Head of Physics · AQA Examiner

1 Welcome

Thank you for your interest in A-Level Chemistry tuition.

The programme has been carefully designed to help students develop secure understanding, strong application skills and effective exam technique across Physical, Organic and Inorganic Chemistry.

Lessons are led by an experienced Science teacher, Head of Physics and AQA examiner who understands the demands of advanced Science study and what it takes to achieve top grades.

Our goal is to help every student build confidence, deepen their understanding and reach their full potential.

Led by an experienced Science teacher, Head of Physics & AQA examiner

Current curriculum expertise and insight into exactly what examiners reward.

2 Who Is This Programme For?

Students currently studying A-Level Chemistry

Students who need support with challenging topics and calculations

Students who want to improve application skills

Students aiming to improve exam performance

Students aiming for university courses in STEM subjects

Students who want structured support throughout Years 12 & 13

3 How Lessons Work

Each weekly lesson includes:

- ✓ Teacher explanations
- ✓ Worked examples
- ✓ Exam-style questions
- ✓ Homework
- ✓ Guided notes
- ✓ Calculation practice
- ✓ Retrieval practice
- ✓ Discussion and questions

Lessons are interactive, supportive and designed to build understanding and confidence over time.

Students are supported through regular assessments, feedback and structured progression throughout the course.

4 What Makes This Programme Different?

Regular Assessment & Feedback

Unlike many tutors who simply teach weekly lessons, students complete regular assessments throughout the course.

Identify gaps in understanding

Track progress over time

Build exam confidence

Provide targeted feedback

Help parents monitor progress

This consistent cycle of assessment and feedback is key to long-term success.

5 Curriculum Overview

Physical Chemistry

- Atomic Structure
- Kinetics
- Amount of Substance
- Equilibria
- Energetics

Organic Chemistry

- Alkanes
- Carbonyls
- Halogenoalkanes
- Aromatic Compounds
- Alcohols

...and many other key organic chemistry topics.

Inorganic Chemistry

- Periodicity
- Transition Metals
- Group 2
- Group 7

The programme follows the AQA specification, with all key topics, practical skills and application of knowledge covered in depth.

6 Exam Preparation

Throughout the course students receive:

Topic tests to check understanding

Exam-style question practice

Past paper practice

Practical skills and data analysis

Mark scheme training and examiner insights

Revision strategies and support

Students learn how to apply knowledge accurately and effectively to achieve top exam performance.

7 Why Families Choose Sugee's Science Tutoring

Experienced Head of Physics

Extensive teaching and leadership experience.

AQA Examiner

Insight into examiner expectations, mark schemes and common pitfalls.

Structured Long-Term Programme

Clear progression, regular assessments and detailed feedback.

Strong Exam Preparation

Students develop exam skills, confidence and accuracy.

Regular Assessment & Feedback

Frequent assessments and detailed feedback help students identify gaps and monitor progress.

Proven Results

Students make strong progress and achieve their academic goals.

8 Fees & Enrolment

For current availability and pricing, please visit our website.

sugeesciencetutoring.co.uk

Spaces are limited to ensure high-quality teaching, structured support and effective progress monitoring.

9 Next Steps

1

Join the waiting list on our website

2

We will contact you regarding availability

3

Discuss the most suitable group

4

Attend a trial lesson (if available)

5

Begin the programme and start your journey

Success in A-Level Chemistry comes from strong understanding, consistent effort and learning how to apply knowledge effectively in examinations.
